

Forum for 21st century on Global Emission Trading

Propositions to 2nd Draft

The ASEAN community would like to express our deepest respect to the Forum for XXI. century for its Second draft proposal. We appreciate the complex review of processes connected with climate change mitigation and adaptation that precede our Conference. Furthermore we also acknowledge the advanced UNFCCC Bratislava accord (referred to as accord). Nevertheless we would like to kindly ask for respecting our proposals. We recommend to:

- ❖ emphasize and develop in the first paragraph of Preface that the progress should be guaranteed to all regions of the world with special attention to the developing countries,
- ❖ explain who is responsible for approving deflection corridor for certain legitimate cases within the CAT framework (Propositions, article 1.) and develop the system of approval,
- ❖ clarify the “established treaties and enactments under the Convention” mentioned in the first article of accord,
- ❖ specify the “certain economic liberties” in the second article of accord,
- ❖ delete the words “or may not” in the eighth article of accord (third sentence),
- ❖ explain the expression “sudden cases” mentioned in the tenth article of accord, at least in the footnote,
- ❖ add a clause to the twelfth article of accord in this version: “if the requirement of gaining 60% of UNFCCC Parties representing 85% of their total GDP in Rate of Exchange Parity is not accomplished within 12 months after the last day of the Conference, the Parties are obliged to summon a new conference”.
- ❖ omit sentence about opting out of the Execution Protocol I in the twelfth article.
- ❖ define the penalization of breaking the rules set by the Convention
