

Forum for 21st century

Propositions to 1st Draft

The United States of America accepts an opportunity to participate on Forum for 21st century. We consider the situation of Bashar Hafez al-Assad regime in Syria very alarming. We are very thankful for the possibility to express our standpoint on this problematical issue and so that help to find the right solution of this problem.

The United States of America commends the disagreement with the regime that is functional in Syria. We declared that all the responsibility of the situation in Syria is subject to Assad. The proofs about the using chemical weapons directly indicate to the Assad regime and now it is inconceivable that the situation in Syria is going to be the same as was before the civil war.

The United States of America adopts the US-Russia deal on chemical weapons to prove that our target is not just a power threat but we prefer to limit the chemical threat.

The United States of America commends to the consecutive issues:

1. The hostilities are required to stop

We call upon to stop the hostilities in Syria with the degradation of Assad regime and with the claim of new democratically elections in the country. We want to claim this target with the weapons embargo on the Assad army.

2. The end of hostilities is to be assured with a weapons embargo

The USA appreciates the progress on the dismantlement of chemical weapons of mass destruction in Syria. It is important of continuing peace is to be safeguarded a weapons

embargo needs to be enforced. We suggest the weapons embargo for Assad army, but not for the insurgents. We support the insurgents in the degradation of Assad regime.

3. Free and equal elections shall decide the future of the country

We agree that the solution has to be democratic. The USA calls upon that the realization of this ideal is free and equal elections, in which all sides of the Syrian political spectrum can take part and where every citizen can cast a vote for her/his preferred political party.

4. Humanitarian inspections must be allowed, 5. Humanitarian aid must be given

The United States of America concurs with the proposal, that neutral units of the UN have to have access to prisons, hospitals, police stations, government buildings, and any other localities where violence may ensue in the transition period. These inspections shall make indubitable that every side of the conflict is following the principles of a truce and is not engaging in retribution-like behaviour. We declare that is important to prescribe any further action that the major powers agreed upon. It shall be made public to the international community and it should have as its primary goal the achievement of a truce in Syria

6. A memorandum must be signed

We take notes of the signification of signed memorandum. We believe that in the Forum we are going to make the consensus with the all major state. We understand that situation in Syria is alarming and dangerous for the rest of world.

Forum for 21st Century
Faculty of International Relations
University of Economics in Bratislava

We the United States of America support the Forum for 21st Century and we hope that this situation will be solved in short time.

The Head of United States of America delegation
